SUMMARY

Information Technology undergraduate with a strong foundation in DSA, OOP, DBMS, and SQL, with hands-on experience building and deploying end-to-end ML/NLP applications, including DiagnoWise (~92% accuracy) and ResumeIQ (~89% accuracy). Completed a Data Science internship focused on feature engineering and model optimization for customer churn prediction.

EDUCATION

Swami Keshvanand Institute of Technology, Jaipur	2023 – 2027
B.Tech in Information Technology (Honours)	CGPA: 8.07
Central Academy School, Chittorgarh	2022
Senior Secondary (Class XII)	Percentage: 69.20%
Central Academy School, Chittorgarh	2020
Secondary (Class X)	Percentage: 90%

SKILLS

Programming Languages: C++, Python, SQL

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, Streamlit

Databases: MySQL

Tools: Git, GitHub, Jupyter Notebook

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS

PROJECTS

DiagnoWise | Python, Pandas, Scikit-learn, Streamlit

[Demo](#)

- Engineered an ML-based disease prediction system using Decision Tree, Random Forest, and Gradient Boosting classifiers on a Kaggle dataset containing **5,000+ records**, achieving approximately **92% accuracy**.
- Optimized classification performance through data preprocessing and **hyperparameter tuning** across multiple models.
- Designed a searchable symptom index covering **130+ symptoms** across **41 disease categories**, categorized into clinical domains for structured input handling.
- Developed and deployed an end-to-end **Streamlit-based web application** delivering **real-time disease predictions** from user-reported symptoms.

ResumeIQ | Python, NLP, TF-IDF, Scikit-learn, Streamlit

[Demo](#)

- Built an NLP-based resume screening system using **2,400+ resumes** across **8+ professional categories** for resume classification and candidate-job matching.
- Applied **TF-IDF vectorization** and **cosine similarity** to rank candidates against job descriptions.
- Implemented a **Logistic Regression classifier** for automated resume categorization, achieving approximately **89% accuracy** on the test dataset.
- Created **skill-gap analysis** and **job recommendation** modules to identify missing skills and generate career recommendations.

EXPERIENCE

Data Science Intern | AvikaSoft

May 2026 – Jul 2026

- Developed a **Customer Churn Prediction** model using Python, Pandas, NumPy, and Scikit-learn on **10,000+ customer records**.
- Performed data preprocessing and **feature engineering**, handling missing values, outliers, and categorical features to prepare data for model training.
- Trained and compared **4+ classification models**, including Random Forest, Decision Tree, Logistic Regression, and Naive Bayes, applying **GridSearchCV** for hyperparameter tuning and evaluating model performance.

CERTIFICATIONS & ACHIEVEMENTS

- Secured **Top 5** among **80+ teams** at the **Health Hackathon** hosted by **JECRC University**.
- Served as **Graphics Lead** at SKIT's Science & Technology Club, leading design initiatives and conducting UI/UX workshops for **100+ students**.
- Earned the **EC-Council Certified SOC Analyst (CSA)** certification with an exam score of **91/100**.
- Recognized as a **2x NPTEL Star** for academic excellence, earning additional credits toward **B.Tech Honours**.
