OBJECTIVE

Results-driven B.Tech IT student with strong foundations in Machine Learning, Python, Data Structures & Algorithms, and C++. Skilled in data preprocessing, feature engineering, and building supervised learning models using libraries like NumPy, Pandas, and Scikit-learn. Adept at solving complex problems and developing data-driven solutions, seeking to apply ML expertise in real-world applications.

SKILLS

Languages: C++, C, Python, SQL

Machine Learning: Regression, Classification, Model Evaluation, Feature Engineering

Libraries: NumPy, Pandas, Scikit-learn, TensorFlow

Core Concepts: Data Structures & Algorithms, OOPs, DBMS, Operating Systems

Tools: Jupyter Notebook, Google Colab

Databases: MySQL

EDUCATION

B.Tech in Information Technology (Honours)

Swami Keshvanand Institute of Technology, Jaipur

Senior Secondary

Central Academy School, Chittorgarh

Secondary

Central Academy School, Chittorgarh

CGPA: 8.01

2023–2027

Percentage: 69.02%

2022

Percentage: 90%

2020

EXPERIENCE

In-House Intern

SKIT Jaipur

Offline

July 2024

- Developed 5+ responsive web interfaces using HTML, CSS, and JavaScript, ensuring cross-browser compatibility.
- Optimized UI structure and styling, improving load time by 15% and enhancing user experience.
- Implemented DOM manipulation and interactive components to improve user engagement.

Machine Learning Intern

EN Softwares and Solutions

Offline

June 2025

- Processed and analyzed 10k+ data records using Python, NumPy, and Pandas for model development.
- Performed data preprocessing, cleaning, and feature engineering on structured datasets.
- Built and evaluated supervised learning models for regression and classification, achieving up to 85% accuracy.
- Improved model performance by 10–15% through hyperparameter tuning and model optimization techniques.

PROJECTS

Box Office Revenue Prediction

Machine learning model for revenue prediction using structured data.

Python, Pandas, Scikit-learn

- Processed 5k+ movie records and performed data cleaning, transformation, and feature extraction.
- Engineered 10+ features including budget, genre, and release timing to enhance model accuracy.
- Implemented regression models achieving up to 82% prediction accuracy.
- Optimized performance by 15% using feature selection and hyperparameter tuning.

Anomaly Detection System

Unsupervised learning system to detect anomalies in datasets.

Python, Scikit-learn

- Analyzed 10k+ data points and applied preprocessing techniques including normalization and scaling.
- Implemented Isolation Forest and statistical methods for anomaly detection.
- Achieved 85% detection accuracy through model tuning and threshold optimization.
- Reduced false positives by 12% using optimized feature scaling techniques.

CERTIFICATIONS AND ACHIEVEMENTS

- Completed 6 NPTEL certifications across technical and non-technical domains
- RCAT – EC-Council Certified SOC Analyst
- Completed Infosys Springboard Virtual Internship program
- Graphics Lead, Science and Technology Club
